

## Overview

Smart Monitor is a video and security management solution that can integrate with any kind of security and surveillance device such as cameras (Analog & IP based), encoders, access control devices, intrusion alarms, and fire alarms etc. The solution can be scaled to accommodate any number of cameras and devices with inbuilt video analytics. The solution can be customized to the existing technology and topology of the customer In order to better suit the needs and budgets, SmartMonitor is offered in different versions that range from few cameras and basic needs to multi-site, multi-server installations with thousands of cameras and integrations to other systems.

Smart Monitor is available in three versions – Lite, Enterprise and Corporate.

Smart Monitor Lite supports live video view, network video and audio recording and archiving along with smart storage with archiving solutions and smart search on storage. The software also helps automatic PTZ (Pan, tilt, zoom) control of camera through software. One of the salient features is management of network devices through maps. It also features automatic detection of network devices, multi level user authorization and distributed processing capabilities

# Technical specifications

Features		SGS Lite Version
No. Of Camera Support		16
Live View (30 FPS)		Yes
PTZ control of Camera		Pelco P, Pelco D
Resolution		D1
Audio Streaming		One way
Audio Compression		AAC, G.711
Audio Recording		Yes
Video Codecs		MJPEG, MPEG-4, H.264
Platform		Proprietary
Evidence Export Formats		Mp4
Supported IP Brands		Ipnetcam, AXIS, Mobilygen
Supported IP Models		3
Full Client		Yes
System alerts including Archive Failure, Deleted Camera, Non-responsive Camera/Server, Disk Space Low		Yes
No. of Client (GUI instances) Access		5
Email		Yes
Multi-Level User Authorization	Controlling Access privileges of user-group	Yes
	Multiple levels of Users	Yes
	Controlling actions allowed at camera level	Yes
	Logging of user actions by time, locations and cameras	Yes
Storage	Recording and Playback	Yes
	Per-camera configuration for schedule	Yes
	Storing of Video on NAS storage	Yes
	Periodic Snapshots (JPEG) storage for video inputs which are not continuously recorded	Yes
	Storage capacity display in terms of time and capacity left	Yes
	Early warning system for storage	Yes
Advanced Search in Archive AND/OR Storage	Search by Date / Time	Yes
	Search by Activity/Alarm (To be provided in Advanced Version / Upon Client request)	Yes
Automatic Detection of Network devices		Yes
Camera location identification on Maps		Yes
Distributed Processing (Multiple Servers)		Yes
